- Languages: HTML, CSS, JavaScript, PHP
- Frameworks & Libraries: React.js, Node.js
- Databases: MongoDB, MySQL
- Web Development: Responsive Design, Cross-Browser Compatibility
- Graphic Design: Adobe Photoshop, Canva, Figma
- Video Editing: After Effects, Adobe Premiere Pro
- Mobile App Development: Basics of Android Development
- Other: Power BI, Prompt Engineering

Education

- **B.Tech in Information Technology (Ongoing)**
Somaiya Vidyavihar University 2022-2026
Web Development, Database Management, Mobile App Development, Graphic Design
- **Higher Secondary Education**
Birla College, Kalyan 2020 - 2022

Experience

- **Full Stack Developer Intern**
Meshcraft (3D Asset Company) MAY 2025 - PRESENT
 - Collaborating with cross-functional teams to develop and improve full-stack web applications using React.js, Node.js, and MongoDB.
 - Contributing to both frontend and backend development to enhance asset workflows and platform usability.
 - Implementing user interface enhancements to improve user experience and functionality of the platform.
- **Creative Content Strategist**
Freelancing 2020-PRESENT
 - Led content creation and strategy for a niche Instagram page, focusing on audience engagement and growth.
 - Designed posts using Canva and Photoshop, optimizing for performance with basic analytics.
 - Established a consistent visual style to increase follower interaction and retention.
- **Visual Experience Designer**
Freelancing 2020 - PRESENT
 - Created digital marketing materials, celebratory posts, and animated videos for various clients.
 - Managed visual branding and storytelling for Instagram and other social media platforms, driving engagement and brand recognition.
 - Leveraged design tools like Adobe Photoshop, Canva, and After Effects to produce visually appealing content.
- **E-commerce Website Developer**
 - Developed an e-commerce platform with PHP and MongoDB, incorporating user authentication, shopping cart functionality, and an admin dashboard.
 - Designed dynamic pages to showcase products, manage user orders, and track inventory.
- **Dynamic Portfolio Website Developer**
 - Built a fully responsive portfolio using HTML, CSS, JavaScript, and React.
 - Incorporated interactive elements and animations to showcase projects, certifications, and design work.

Soft Skills

- Creativity & Innovation
- Problem-Solving & Analytical Thinking
- Strong Communication & Public Speaking
- Team Collaboration & Leadership
- Time Management & Organization

Languages

- English (Fluent)
- Hindi (Fluent)
- Gujarati (Basic)

Interests

- Exploring new trends in technology and social media marketing.
- Experimenting with innovative video editing techniques.
- Participating in workshops to enhance coding and design skills.

Certifications

- Prompt Engineering for ChatGPT
- Introduction to Mobile App Development
- Power BI
- Introduction to Generative AI for Data Analysis
- Blockchain Basics
- Google SEO Fundamentals
- Java Programming: Solving Problems with Software
- Digital Product Management: Modern Fundamentals
- Advanced Content and Social Tactics to Optimize SEO

Projects

- **AR/VR Visualization Tool**
(TY Mini Project)
 - Developed an immersive AR/VR application to visualize numerical data from textual input.
 - Translated datasets into interactive 3D scenes using Unity and AR frameworks, enhancing data analysis and interpretation.
- **Graphic Design & Video Projects**
(Freelance + College)
 - Produced promotional graphics, animated videos, and celebratory posts for clients and college events.
 - Focused on storytelling and brand consistency across multiple social media platforms, improving client engagement.
- **Automated Financial Reporting System**
Tech used: Python, Flask, Pandas, openpyxl
 - Developed a Flask-based web app to automate the generation of financial reports. The system processes uploaded CSV files, calculates key metrics (Gross Profit, Net Profit, Profit Margin), and generates downloadable Excel reports.
